

Talks 6... Care Homes - Spiritual...

I researched mind'body'spirit for 6 years recently after I had a NDE in 2015 - I started to see sparkles in my mind after, I now know were Angel Sparkles, and since with all my years knowledge and helping - I am a Spiritual Advisor.

So where is this place they call heaven? On space websites they say our universe is vast - there are over a billion galaxies out there, and they say each galaxy has billions of planets.

Out there is the lower astral realms where very bad people go to - but out there in the higher astrals is this place Heaven - we've all been there before, its home - we've just forgotten on our long journey here.

I'm 70 years old now - when I had this NDE in 2015, I was ill for some time - then one day I lay on the bed 'no fear' I'd had enough, I just kept saying mum where are you... I was allowed to go so far into death that I witnessed my spirit inside me excited ready to fly, I know now I was allowed to go so far to teach me to share with others.

Then maybe an hour later I felt a hand on my forehead - I recovered so fast, I was driving the next day from Macclesfield to Warrington.

So all this, including being shown a vision of Jesus in my church in 2016, all happened to teach me, and to share with others - to give hope when our body is weary - the spirit lives on after.

When we pass from here, have no fear when its your time - shortly before you will get knowledge / guidance from your Guardian Angel and Guides 'that' it's your time - life plan completed.

Sometime in the last few days my mum had left of her life - she said to me I can see Reg and Sid, her brothers, they had come to her in mind.

And with my mum in law in 2012 who we nursed at home with us in the last year she had made connection with spirit earlier - she was chatting a lot to someone, her husband we think.

I worked on my computer in my little office along the landing from where she was in bed most of the time, and I had one main job - that was to monitor her and shout to my wife if she needed anything.

Well, the times she would be chatting away to someone - and do you know every time I sneaked across the landing to listen by her bedroom door, I would hear her talking just for a second, then she'd stop.

Now no way did she hear me tip toe along the landing carpet 15 feet away - someone she was speaking to told her shhh Steve's listening.

So when its your time - and on death and your spirit exits the weary body, you will know and remember where you came from all those years ago, 'you will remember' this place called heaven and feel at ease - sometimes Guides will come to you to reassure you, well before it's time for you to depart - and this place called Heaven, it exists.

On your final day here on this planet, and you take your last breath - your spirit Guides / Angel's will have already been in touch with you by then to reassure you - then your spirit exits the body, then back in younger years in looks, and in perfect health - that's how it works.

So exactly where is this place called heaven with many mansions as is described in the bible - if we've been there before.

Out there in the universe, science says there are more stars / planets in the vast universe than grains of sand on 'all the beaches' in the world.

Just imagine trying to count the grains of dry sand in a spoonful, you'd be there all day - well on space websites they confirm there are more planets than grains of sand on all the world's beaches.

But when it's your time you won't need to worry about directions; how to get there, or a passport - all arranged Spirit Guides, who've been assigned to be with you all your life - will show you the way home.

So stay positive in mind, keep smiling, and be kind to others...
